DICKSON[®]
indoor furnishing

DICKSON®

is launching its 1st collection
of high-end indoor flame retardant fabrics.

Already known as the global benchmark for outdoor fabrics, Dickson® is now creating a buzz on the indoor fabric scene with the release of its first collection of exquisite fire retardant fabrics designed especially for indoor decorating and the hotel industry.

Smart, chic and elegant, this collection incorporates impressive technical performance with upscale aesthetic codes.

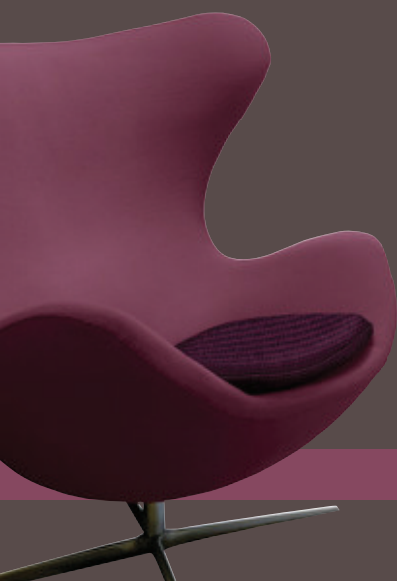

It gives decorators, interior designers and architects a vast array of colours and textures to work with.

DICKSON® lance sa 1^{ère} collection tissus indoor FR haut de gamme

Référence mondiale des textiles outdoor, Dickson® crée l'événement en éditant sa première collection de tissus non-feu haut de gamme destinée aux secteurs de l'ameublement d'intérieur et de l'hôtellerie.

Chic et élégante, cette collection allie performances techniques et codes esthétiques.

Elle offre ainsi aux architectes, décorateurs et designers, une large palette de coloris dans des constructions variées.

This first edition was inspired by **trendsetting neighbourhoods in cities all around the world**: Prado, Tribeca, Saint-Germain, Navona, Samoa, Kowloon and Soho.

The collection includes **142 references** that mix and match beautifully to create a **harmonious overall look and feel of each and every living space**. The different types of fabric (from thin veil-like textures to heavy draperies and decorative Jacquards to black-out shades) resemble natural fibres to a tee and can be used for all types of applications (from curtains to cushions and roman blinds to upholstery, bedspreads and so forth).

*Cette première édition puise son inspiration dans les **tendances des grandes villes du monde**... Prado, Tribeca, Saint-Germain, Navona, Samoa, Kowloon et Soho.*

*142 références constituent la collection qui permet de jouer la complémentarité et d'harmoniser les différentes qualités de tissus, pour **habiller un espace à vivre dans sa totalité** : rideaux, coussins, stores, ameublement et couvre-lits. Du voile léger au tissu épais, du jacquard ornemental à l'uni occultant, les matières imitent à la perfection les matières naturelles.*

FLAME RETARDANT

fabrics that are safe for humans
and the planet

REACH :
Registration
Evaluation
Authorisation
and restriction of
Chemical

REACH is the European Community regulation on: registration, evaluation, authorisation and restriction of chemical substances.

This label mandates that companies manufacturing or importing chemical substances must calculate the risks resulting from their use and take appropriate measures to manage such risks.

Dickson complies with the REACH regulation.

The fabrics in Dickson's new Indoor Contract collection* comply with the Oeko-Tex® 100 label requirements, certifying that they do not contain any toxic substances and do not present any risks to human health, skin or the environment.

* Except for Samoa

DES TISSUS NON FEU respectueux pour la nature et sains pour l'homme

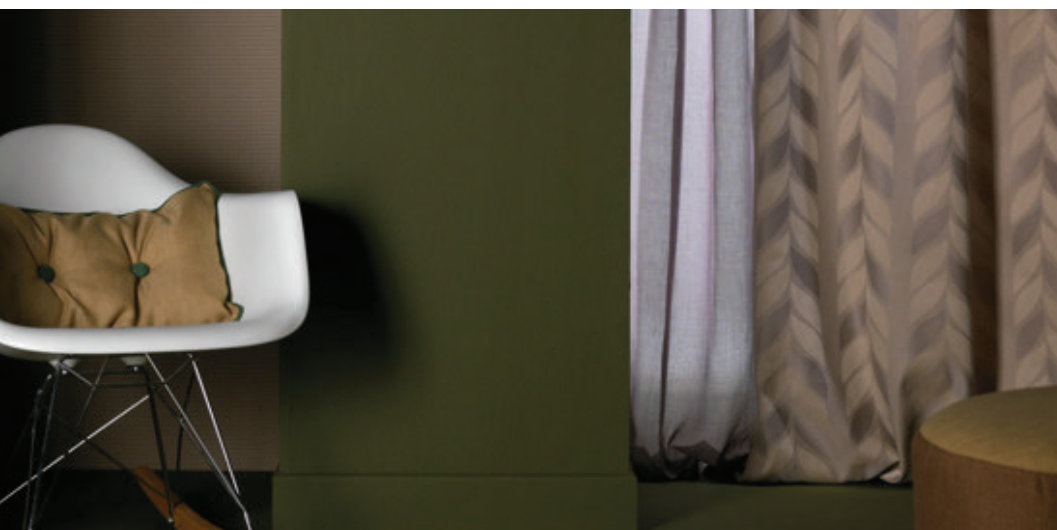

REACH est le règlement sur l'enregistrement, l'évaluation, l'autorisation et les restrictions des substances chimiques.

Ce label oblige les entreprises qui fabriquent et importent des substances chimiques à évaluer les risques résultant de leur utilisation et à prendre les mesures nécessaires pour gérer tout risque identifié.

Dickson est conforme à cette réglementation Reach.

Les tissus de la collection Dickson® Indoor Contract* sont conformes au label Oeko-Tex® 100. Ce label certifie qu'ils ne comportent aucune substance toxique et ne représentent aucun risque pour la santé, pour la peau ou l'environnement.

* Sauf Samoa

Dickson's Indoor Contract collection provides the best guarantees in terms of quality and safety as well as aesthetic appeal. Today's fire retardant regulations impose considerable restrictions on public venues, requiring them to comply with specific safety standards designed to minimize potential fire hazards and to prevent eventual fires from spreading.

Dickson® offers a full range of fireproof fabrics that meet all the toughest FR standards, in compliance with all the current European and international guidelines (M1/B1/C1/BS/IMO)*.

* See back for details.

La collection Dickson® Indoor Contract offre le meilleur en termes de qualité et de sécurité sans négliger l'aspect esthétique des tissus. La réglementation non feu contraint aujourd'hui de nombreux lieux publics à respecter des normes de sécurité pour limiter tout risque d'incendie et leur propagation éventuelle.

Dickson® propose des tissus ignifuges répondant aux normes non feu les plus élevées, dans le respect des règles européennes et internationales (M1 / B1 / C1 / BS / IMO).*
